Impressive Funeral Service at Sibbald For Mrs. A. C. Hoenig

Funeral services for Constance Hoenig, beloved wife of Mr. A. C. Hoenig of Sibbald, Alta., were held in Sibbald community hall, on Saturday, May 21, 1932, at 3:30 p.m. Service was conducted by Rev. C. M. E. Parsons of St. Augustine's Church, Alaska, after which members of Somme Chapter No. 35, Order of the Eastern Star, performed the last rites for a departed sister. Following the services in the community hall, the cortege proceeded to Sibbald cemetery where interment took place. The funeral was probably the largest ever held in Sibbald.

Oyen High School Report of Standing

The following is a report of the standing of the pupils of Oyen high school, as at May 19, 1932.

8 units—June Walker 47, Allen Scott 75, Beryl Scott 82, Fred Hatch 59, Irene Carron 64, 7 units—Harold Keown 54, Minnie Thygeson 53, Marjorie Holloway 53, John Pokojowy 60, Esther Mahaffey 40, Ethel Mahaffey 41, Dorothy Brown 54, Evelyn White 75, Stanley Noun 51, Jim Lees 45, Phyllis Lowe 77, Helen Love 71, Jack Snyder 62, Christine Kerr 77, Hanna Erskine 81, Tom Lowe 53, Jennie Love 53. 6 units—Bill O'Neal 40, Beth Whitlock 47, Elsie Peterson 53, Howard Balaban 37, Becket Lowe 48, Valma McDonald 63, Alma Brown 52. 5 units—Andrew Lees 63, Alberta Wenger 54. 4 units—Victor Thygeson 43.

even the community hall was not quite large enough to accommodate all who came to attend the service. The number of floral offerings banked around the casket, made a fitting tribute of the love and esteem in which the late Mrs. Hoenig was held. The funeral arrangements were in charge of Mr. George Preston of Alaska, assisted by Mr. D. G. Shannon of Eston, Sask. Messrs. E. Ahlstrom, O. Myers, Rex Mowers, H. M. Ball, W. Linklater and Earl Green, all of Sibbald, acted as pallbearers. Besides that of the family, beautiful floral tributes were sent by Somme Chapter No. 35, Order of the Eastern Star; Sibbald Ladies Aid; Women's Auxiliary of St. Martin's; Women's Institute; Oyen Lodge No. 104, A.F. & A.M.; the Business men of Sibbald; Highland Park U.F.A.; the Misses Gustafson and Hutchinson and children of Sibbald School; Boston, McKong and Brown families; Mr. and Mrs. McGillis and family; Mr. and Mrs. O. Myers and family; Gunner Kemstrom; Earl Green and family; Mr. and Mrs. John Berg, Trail, B.C.; Mr. and Mrs. John Young, Glenwood Springs, Colo.; Mr. and Mrs. A. V. Youell; Mr. and Mrs. Noble Martin, Waterloo, Iowa; Wilber Briggs, Waterloo, Iowa; Mr. and Mrs. H. M. Ball; Mr. and Mrs. V. Linklater; Ahlstrom, Scott, Eastman and Gallagher families; Mr. and Mrs. H. Hunter; Mr. and Mrs. Evan Arnstad and Wm. Benson; Mr. and Mrs. F. M. Strong; the Misses Grace and Ethel Brookman; Mr. and Mrs. Callin and Mr. M. Switzer; Rex, Wayne and Jay Mowers families; and Mr. and Mrs. D. G. Shannon, Eston, Sask.

The late Mrs. Hoenig, who died at the age of 34, was born in Dublin, Ireland. She was married in Alaska, Sask., June 20, 1923. Her death, which occurred suddenly Tuesday May 17, 1932, came as a profound shock. Apparently in normal health with the exception of a slight cold, she retired Monday evening. During the night she complained of a headache, but

HOW MANY SUPERTWIST CORDS

IN THE AVERAGE GOODYEAR TIRE?

GOODYEAR
PRIZE CONTEST
\$3000.00
IN CASH PRIZES

- 1st prize . . \$1,000.00 cash
- 2nd prize . . \$500.00 cash
- 3rd prize . . \$200.00 cash
- 4th prize . . \$100.00 cash
- 5 prizes, each . . \$50.00 cash
- 104 prizes, each . . \$10.00 cash

154 prizes totalling \$3,000.00

A cool THOUSAND DOLLARS for merely estimating the number of cords in the average Goodyear Tire! Think of what you could do with that \$1,000.00. New car? . . . Cottage at the lake? . . . Trip abroad? . . . Education for the youngsters? . . . Oh, there are plenty of wonderful things one can do with real money and lots of it.

You don't have to spend a cent of money to enter. Read the simple con-

test conditions, get an entry blank from us and send in your estimate to-day.

Anyone from a household where a car is owned may enter. All tire dealers, all employees of rubber companies and the families of both are, however, debarred.

See the six Goodyear Tires of various sizes, types and ply-thicknesses on display here. Estimate the number of cords, find a total and divide by six to strike the average. Submit the number you estimate on a standard entry blank.

A section of Goodyear Supertwist cord fabric is on display to help you make your estimate.

Closing date: June 5th, 1932. Address: "The Goodyear Supertwist Cord Contest," New Toronto, Toronto 14, Ontario.

Johnson's Garage

Main Street, Oyen

Phone 14

Come in and see Supertwist Cords demonstrated, and get a helpful booklet of contest directions.

DAIL PASSES ACT TO ABOLISH THE ALLEGIANCE OATH

Dublin, Ireland.—Abolition of the parliamentary oath of allegiance to the British crown was given approval of the Dail Eireann, despite a desperate eleventh hour attempt to prevent President Eamon de Valera's bill being written into the statute books. The Dail, by a vote of 77 to 69, gave final approval to all four sections of the measure.

Voicing unqualified opposition, J. McDermott, Independent, claimed the bill should be withdrawn until after the Imperial Economic Conference at Ottawa in July. He charged De Valera with harboring "twins hatched against the late administration of President W. T. Cosgrave and against England."

"Removal of the oath is a domestic matter," stated President De Valera in a brief speech winding up the debate. No sensible person, he asserted, would suggest the bill was intended to act of severance of the Free State from the Empire.

The bill provides, besides abolition of the oath, three other constitutional changes.

Of these the most contentious is the second section, which repeals the second part of the constitution which provided that anything in the constitution of the Free State repugnant to the terms of the Anglo-Irish treaty should be null and void.

Long and bitter debate preceded final passage of the bill, with party lines holding intact. The Labor group in the chamber, the Labor group, whose attitude remained somewhat in doubt up to the time of the final vote, voted solidly with the government.

The first division came on an amendment put forward by Patrick McGilligan, supporter of William T. Cosgrave. After a sharp discussion the government emerged victorious with a majority of eight. The majority it obtained on the second amendment and on the final vote.

Mr. McGilligan urged abandonment of the second section of the bill. He said President De Valera, by his election last March, had obtained a mandate from the people to abolish the oath, but not to make the constitution override the Anglo-Irish treaty.

"Taking the oath of allegiance," said De Valera last night, "was not obligatory unless the Free State made it so by domestic legislation."

The whole question, the president declared, lay in whether or not the Free State was on the same level as other countries in the British Commonwealth of nations. Other dominions, he said, could remove the oath if they wished.

"We have the same right and we are going to remove the oath," he emphasized. "It is in our interest to do so. The people want to remove it and we will give effect to their wish. We are doing it without any violation of the treaty."

Spain Requires Wheat

Government Carrying On Negotiations For Large Purchases

Madrid, Spain.—Financial circles said the Spanish Government had approached local branches of foreign banks in an attempt to arrange payment for the contemplated importation of 100,000 tons (about 5,753,000 bushels) of wheat.

The result of the negotiations was not known, but the government wants to spread the payment over periods of three, six and nine months. It was understood, the wheat to be bought from Canada, the United States and Argentina.

Banking circles said a government decree ordering the purchase of the wheat, expected soon, would bring Spain's total importations to 200,000 tons (about 7,466,000 bushels), but that it probably would be necessary to import another 200,000 tons before the new crop is available in July, since the domestic supply is exhausted.

Thinks Judges Underpaid

Ottawa, Ont.—Canadian judges are too numerous and underpaid, Premier R. B. Bennett told the House of Commons. The judiciary as a whole does not reflect the genius of the legal profession from which it is recruited, and in too many instances political patronage, rather than individual merit, has elevated a man to the bench.

Six hundred firms had exhibits at this year's agricultural implement show in Paris.

Germany exported more shoes last year than in any twelve-month since 1918.

Doukhobors Pretext

Write Letter To Press and Send Message To The Hague

Vancouver, B.C.—Doukhobors facing charges between Hindu and Moslem broke out in Bombay, despite the presence of alert British soldiers, and before it was checked 11 more persons had been killed and 18 injured.

Thus the toll of the communal fighting, which has flared intermittently for some days, rose to 99 dead and 948 wounded.

British troops frequently opened fire to check occasional street battles. There was still some looting, but the authorities expressed confidence that they were gaining control of the city through the energetic action of the soldiers.

"We know that truth is bought on Golgotha, and will remain there. We forgive everybody who has mistreated us. But when we come to our children's graves, there is no excuse for civilized people to force others into conditions that they do not wish to bear. The whole world has been aroused by the Luftharber case. But what is going on in Nelson: Is it worse or only marginally a drama full of man's inhumanity to man?"

Representatives of the Doukhobors have sent a cablegram to the "anti-militaristic bureau at The Hague," protesting against their treatment.

The Doukhobors—of Free of Canada—urged to you—"runs the message. "Please raise your voice in the name of trampled truth. Seven hundred in jail, where they are already sentenced to three years' imprisonment. The same conviction awaits the rest—just for appearing male in protest against brutality. Our children forcibly taken away from their mothers. Please take this matter to the attention of the public before God and all idealists. Remember our struggle is true. If you are brothers of same faith you can not be silent."

(Signed) Sons of Freedom."

Hunting For "Bachino"

Another Airplane May Enter Search For Deserted Fur Ship

Point Barrow, Alaska.—A double aerial search for the "Bachino," fur trading vessel anchored off the Arctic coast, is in prospect here.

Edna Christofferson, Portland, Ore., said she had seen a plane flying over the rough ice pack without giving the missing ship, which they believed was carrying a valuable cargo of furs.

Pilot Joe Crosson, noted northern aviator here with a motion picture camera on a scouting expedition, also said he might make exploratory flights in search of the "Bachino."

Seattle, Wash.—To replace the steamship "Bachino," lost along the Alaska coast in the ice floes of the sea of the north, the Danish Motorship "Karl" will sail from here in June for the Canadian Arctic via Vancouver, B.C.

The "Karl" was chartered by the Hudson Bay Company from the Swenson Fur Trading Company for a voyage to Herschel Island and other Arctic ports. She will be manned by Canadian officers and crew.

Low Rates On Grain

Transportation Of Grain From Port Will Mount To Quebec's Cheapest Ever

Montreal, Que.—The Gazette published the following:

New record low rates of 3½ cents a bushel for the transportation of grain from Port William to Montreal have been accepted during the last two days. It was announced 10 days ago that five cents a bushel was being offered and accepted, and there was a report that a rate of 4½ cents was even offered. Since then the situation has dropped from low to lower, and several shippers have decided to lay-up their vessels rather than operate them at a loss.

"Though small steamers are carrying grain at this abnormally low figure, it is maintained that no mathematical comparison or calculation will enable their owners to produce a profit from the operation. It is even said grain cannot be carried profitably at several cents a bushel, though several firms decided to continue accepting the lower rate in the hope that the situation would improve during the season."

Arrest Communit

Hamburg, Germany.—Eight hundred Young Communists were arrested here for displaying Communist flags and signs at a picnic. They were released after they had been taken to police headquarters. The police had granted permission for the picnic on condition that no Communist banners or signs.

Bombay Riots

Hindus and Moslems Continue To Engage In Street Battles

Bombay, India.—Fresh sporadic rioting between Hindus and Moslems broke out in Bombay, despite the presence of alert British soldiers, and before it was checked 11 more persons had been killed and 18 injured.

Thus the toll of the communal fighting, which has flared intermittently for some days, rose to 99 dead and 948 wounded.

British troops frequently opened fire to check occasional street battles. There was still some looting, but the authorities expressed confidence that they were gaining control of the city through the energetic action of the soldiers.

Winnipeg, Man.—Establishment of a wheat quota at the Ottawa Imperial Economic Conference would not be in the best interests of wheat producers, chief said of western wheat is of the utmost importance. This was the chief of six points agreed upon at a conference of Manitoba agricultural interests called by Premier John Bracken to formulate Manitoba views for submission to the Dominion Government prior to the conference.

Other points were: (1) The stabilization of exchange is important.

Wider markets are necessary for all varieties of Canadian farm products.

An Empire intelligence marketing board is desirable.

Wider facilities should be provided for the distribution of British films throughout Canada.

Canadian delegates at the Imperial Conference should be asked to give preference to British goods most needed by Canadian consumers such as woolen goods, household articles, textiles, boots and shoes, seeds and plants.

A special committee was appointed to draft the suggestions and instructed to sit in with a conference to be held of representatives of boards of trade and industries other than agriculture, and of both Manitoba conferences will first be laid before a conference of the four western provinces in an automobile accident.

A submission embodying the viewpoint of western Canada generally will be prepared.

U.S. Senate Refuses To Legalize Beer

First Senate Roll Call Brings Overwhelming Defeat

Washington.—The United States senate has refused to legalize beer.

The first senate roll call for beer since prohibition brought overwhelming defeat. The main vote was on an amendment by Senator Tydings, Delaware, to the revenue bill.

Mr. Tydings said he was not entirely satisfied with the United States senate's action in the case of existing American tariff laws there is no inclination on Canada's part to enlarge its trade with the United States.

Churchill Cattle Shipment

Expected Cattle Cargo To Leave Early In August

Churchill, Man.—The first boat to arrive here this summer will return with a shipment of cattle to Europe. While arrangements have been made for the shipping of 2,000,000 bushels of grain via Hudson Bay, the cattle cargo is likely to leave here early in August, before the wheat shipments start.

It is stated here a stockyard will be constructed near the dock. Hay will be brought here from The Pas, Manitoba.

Large shipments of wheat through Churchill to the Spillers Ltd. Mills, at Cardiff and London, England, was discussed in a statement issued by James M. Stevenson, K.C., president of the Board of Trade. Mr. Stevenson said that negotiations had been opened with the British milling firm through the trade through Churchill committee of the Board of Trade.

Mistaya Map Sheet

Alberta-British Columbia Region
Rich in Land of Early Explorers
"Do you know the world's white routes?" asks Kipling in one of his famous poems. In this he is referring to the Himalayas but might have asked the same question in regard to portions of our own Canadian Rockies. The heights of the separating waters flowing into the Pacific and those which eventually find their outlet in the Atlantic and Arctic oceans, is the boundary between Alberta and British Columbia, and this dividing line might be taken as Canada's great white route. It is in this region that several of our most extensive National Parks are situated—Banff, Jasper, Yoho, and Kootenay.

An important part, 1,480 square miles, of this roof of the Dominion is pictured in the Mistaya Map Sheet, recently issued by the Topographical Survey of the Department of the Interior. The sheet covers the area from about the middle of Banff Park westward through Yoho Park to the Moss and Freshfield glaciers, from Takakkaw Falls northward to the North Saskatchewan River. Through this region Alberta-British Columbia boundary winds like a serpent along the ridges joining mountain top to mountain top. Clustered along the boundary are the great fields—Campbell, Moss, Freshfield, Wapta, and Waputik. Glaciers abound everywhere. Here are the sources of great rivers flowing into ocean diversely by the continent. Howse Pass, which is mapped on the left centre of the sheet, separates by only a few ridges the water flowing into the North Saskatchewan and so through the Prairie Provinces to Hudson Bay, from the headwaters of the Mackenzie River, a stream emptying into the Columbia, which later, after a course of many hundred miles, pours its flood into the Pacific.

There are no railways shown on the map sheet but for many reasons the territory is a great tourist region. Takakkaw Falls in Yoho National Park, is shown at the lower edge of the sheet and about six miles south of that point runs the main line of the Canadian Pacific bringing its hosts of visitors to Banff and Yoho Parks. The Canadian National line is located considerably farther north, as is shown on the sheet, serving the more northerly Jasper Park. The great area lying between these two railway lines is the paradise of the trail rider. Shown on the map by a thin red line is the celebrated Banff-Lake Louise-Jasper trail which the trail rider pursues by pack train from trail to trail to a mountain wilderness in all its primal beauty. Excellent fishing, and outside the Park boundaries, good hunting are the reward of anglers and hunters who yield to the call of nature and find time for a trail trip into this mountain wonderland.

The lines of our trails crisscross the sheet in all directions. The reason for this is that before the coming of railways several of the most important trade routes across the mountains led through this territory. The names of the passes shown here indicate this—Banff, Bow, Bush, Clearwater, Dolomite, Howse, Pipestone, and others—passes discovered and used by explorers and fur traders like David Thompson, Joseph House, the Earl of Southesk, and Sir James Hector. Many Indian trails also traverse the area. Over three scores high mountain peaks dot the map, and these with the great fields, hundreds of glaciers, and the dark green coniferous forests on the lower slopes, cause this district to attract a constantly increasing throng of tourists.

It is interesting to note that this sheet is the product of the art of photo-topographic mapping developed to a high degree of excellence by the late Dr. E. Deville, Surveyor-General of Canada, and used with pronounced success in outlining the features of the sea of mountains which separates our Prairie Provinces from the Pacific Coast. The map may be had at a nominal price upon application to the Director of the Topographical Survey, Department of the Interior, Ottawa.

"What are you suffering from?"
"Vanity. I spend hours before the glass contemplating my beauty."
"That's not vanity—that's imagination."
—GUTHRIE, Madrid.

W. N. U. 1943

Close Cutting Might Solve Weed Problem

Nipping Plants Just Below Surface Is Recommended

Advocates of the ploughless fallow for western conditions have further evidence to support their case as the result of recent announcements from the University of Saskatchewan. T. Pavlychenko, who carries on this work at the University, has found that practically all moisture lost from the soil in summer-fallow is due to the evaporation through the leaves of growing plants. He has also demonstrated that the most effective way to kill weeds is to keep the above-ground part of the plant cut back. He is convinced that if a sharp broad implement, of light draught, could be devised to shave the surface of the soil in summer-fallow so that the growing plants would be nipped off just below the surface, much of the weed problem in the west would disappear and with it would go ploughing and other expensive deep cultivation practices. He believes, too, that the adoption of such methods would have a distinctly beneficial bearing on the soil drifting problem on the great plains.

Work with creeping rooted perennial, such as sow and Canada thistle, shows that where these weeds have been simply hoed so that the tops are kept from appearing, a complete kill has been obtained in around 70 days, and that the land so summer-fallowed shows more moisture than land worked by deep cultivation methods and the dust much. Most recommendations for the control of weeds by the use of machinery, which they drag out the roots. Mr. Pavlychenko believes these recommendations to be out of date, pointing out that this method breaks the roots up so that from every broken root left in the field another plant is started and the weed is spread rather than controlled, unless the work is done very carefully and under ideal conditions. Further, the stirring of the soil causes undue evaporation and breaks it down for ideal drifting conditions.

Nipping off the leaves as they appear gradually shrivels the plant and as the roots weaken rot sets in and does the rest. Just at present no implement has been devised to do this, but the ordinary duck-foot cultivator would have to be fitted with hard shovels which could be made very sharp and would keep a sharp edge for a considerable length of time. With such sharp shovels, the cultivator can be made to work at a very shallow depth.

Stormy Days Beneficial

Too Much Sunshine Not Good For People Or Land

It is natural for humans to like the sunny, warm, lazy weather that fills them with a sense of well-being and comfort. When the "sunny" days come they step outdoors, the cold, wet wind drives a sharp, cutting rain to their faces, and they turn up their collars, shiver and complain about the miserable weather. Yet it is the dirty weather that the race needs. It is the dull blustery days that makes old Mother Earth turn smiling green fields to tomorrow's sun. It is the dreary, dark, rainy weather that gives her a chance to do something for the peoples of the earth. Here in Saskatchewan there are too much sunshine. The country needs to be pelted by rain, to shiver under dark skies, to be beaten in the face of Nature in a surly mood. What we need in this country is a poet to sing a joyous lay to a dark, cold, miserable wet, bone-piercing day. There has been too much lolling to the sunshine poets—Hergins Lander.

Urgent Dumping Measure

Claimed Made In Britain Against Dominion Flour Prices

Sir Malcolm Robertson, chairman of Spillers Milling Firm, has made a proposal that Britain should impose an anti-dumping duty against Dominion flour, which he says is sold to England at considerably lower prices than the Dominion producers charge in their home markets. "Following the example of some of our dominions in respect of importation of various goods," said Sir Malcolm, "we should permit importation of Dominion flour only provided it be sold in this country at no lower price than that obtainable for the same quality in the country of origin, plus the cost of freight."

The Dead Sea has no outlet and does not contain animal life. Birds and animals avoid the region.

People of Hawaii are insisting on having better qualities of merchandise than heretofore.

Sheep Are Profitable

Show Better Returns For Prairie Farmer Than Almost Any Other Side Line

Requiring very little care at a minimum of cost, sheep can be depended upon to supply an income for the prairie farmer, irrespective of his grain crops, according to Harvey O. Powell, vice-president and general manager of the Dominion Agricultural Credit Company, Limited. "Every farmer should have a small flock of breeding ewes," says Mr. Powell. "Many farmers for a past number of years have been waiting until breeding ewes were cheap in order that they might secure their foundation stock. A small band of ewes even under today's conditions, are returning their owners more profit per dollar invested than can be made by the farmer on almost any of his other commodities."

"Good breeding ewes are a fair price. They have been high priced for a number of years and will be high priced to some people's way of thinking. The price does not make much difference as long as a farmer intends to stay in the sheep business. Every grain farmer needs them, the cost of keeping them is slight, and the additional income is handy on any farm."

Evids Of Gambling

Excellent Advice Is Given By A Prominent Britisher

Sir Walter Runciman in the Sunday at Home: It has been a stern plan of my romantic life never to put myself in the position of being tempted to borrow, and my considered advice is: never to spend beyond income, never borrow, lend or back him. I have learned the latter plan through bitter experience sometimes. One of the most subtle and puzzling vices of all is that of gambling on the stock exchange and horse racing—a hobby that is not confined to the rich, but has got a deep, fascinating hold of sections of the middle class and that of the poorest. What misery to themselves and to their families and to other people this ugly mystery brings; and yet neither culture, religion or morality can cure the pleasures of this quick puzzle.

After a violent quarrel the young lady took all the man's love letters and tied them up to return by mail. "Second-class matter!" asked the postmaster. "Second-class?" sniffed the girl. "You flatter him!"

A record price of \$8,200 was paid in London recently for a picture by Davis, "The Love Song," signed and dated 1749.

Canada's War Memorial

Will Be Exhibited In London Before Being Shipped To Ottawa

The King has given permission for the exhibition in Hyde Park in the autumn of Canada's great national war memorial to be set up in Ottawa. It is probable that this will be between the Marble Arch and the bandstand on which the New Zealand war memorial carillon was temporarily housed in 1920. The memorial, which will cost about \$50,000, is the work of seven brothers, all experts in a branch of sculpture. The youngest, Mr. Vernon March, who died two years ago, was the designer. Every part of the memorial has been carried out at the March's family home at Farnborough, Kent. It was begun in 1927, the eldest brother, Mr. Sydney March, leading the family team. To lengthen the memorial of heroic acts, representing all the Canadian forces that served in the Great War, they are depicted marching eagerly under a gothic arch of Arch of Sacrifice.

Playing Card Portraits

Tradition Says Two At Least Taken From Real Pictures

As you play poker or nap, you will find it interesting to know whether the kings and queens which prove so useful to your hand ever had any existence outside the pack? It is a long story, but it is true that the two of the honors cards at any rate, are portraits. According to tradition the King of Hearts is a portrait of King Henry VIII in his robes of state, and the Queen of Hearts of Elizabeth of York, the Queen of Henry VIII.

Model Aircraft League

The third annual meeting of the Model Aircraft League of Canada will be held in Winnipeg this year toward the end of August. It was announced at Ottawa. Plans for the event were completed at a meeting attended by Major-General J. H. MacBrien, president of the Aviation League of Canada.

German in East Prussia have taken on a leaf from Hogan's book, and at the estuary of the Nogat, where 4,000 acres were under water, they have constructed dams and drains which dried the entire tract of waste land.

Belgium's national railway will spend nearly \$1,725,000 for 250 new passenger cars.

Motion picture theatres in India, Burma and Ceylon, now number 670.

Rust Resistant Wheat

Milling and Baking Qualities Are Found To Be Good By Investigators

At a recent meeting of the committee on field crop diseases, held in Winnipeg, considerable time was devoted to a discussion on the quality for baking purposes of the varieties of rust resistant wheat, so far developed, says a statement issued by the Department of Agriculture. The statement continues, "Data submitted on milling and baking tests at that occasion clearly indicates that most of the new varieties at present under investigation possess a high degree of quality, both from the milling and baking standpoints, comparing, in fact, very favorably with our best Marquis. Unfortunately, a great deal, issued during the conference, stated that these rust resistant wheats so far developed have usually proven poor for milling and baking purposes, while, as a matter of fact, exactly the reverse is the case."

Almost Unlimited Market

Believes Britain Could Absorb 100,000 Head of Canadian Cattle

To lengthen the season, the sheep should be used early, medium and late maturing sorts, and in the case of the latter we should plant two or three times at ten-day intervals. Before making our flower order, we should check over our list to make sure that we have flowers for cutting, bedding, edging, background and fragrance. There should be early, medium and late bloomers so that there will be flowers all season. We must have a variety of color, but planted so that there will be no clashing of shades. A hastily planned and planted garden where the vegetable crops are crowded, or where pink and yellow flowers come into violent opposition, will certainly not improve the first impression when one is to be most critical. Select your standard varieties, that is, flowers which have given satisfaction in the past, but also add a few new ones for the sake of gaining experience and adding interest.

This is the best time, when the earth is soft and moist, to put the lawn into shape. Dandelions, plantain and other persistent weeds come out easily and in removing them get out as much of the root as possible. Some of the many weeding devices now on the market will save a lot of stooping. At this time, too, a heavy roller is used to good effect, levelling down the lawn and breaking up the roots of the grass. Loosen up bare spots with a rake and re-seed with good mixtures of cheap grasses. These are never permanent and sometimes are dangerous. Protect this new seeding with some poultry netting or burlap, so that sparrows will not get at the seed. Top dressing with well-rotted manure or an application of a good commercial fertilizer, high in nitrogen, is advisable. If manure is used, be careful that it is well-rotted and free from weed seeds. The lawn should be cut every four or five days, after growth gets well started, with a sharp lawn mower. A dull machine will pull out much of the grass. Later on, when the weather turns hot, less frequent cutting is advisable.

Do Not Value Roads

Villagers have dug great holes in the Grand Trunk road of India where it runs through Chandernagore, a little French settlement, twenty miles from Calcutta, in order to get bumps or tar to use in lighting their fire.

Some of the holes are four feet in diameter and a foot deep.

Britain Will Pay

Great Britain, it is announced, will pay her debt to the United States if the United States requires her to do so. Therefore, we have no hesitation in announcing that Great Britain will pay her debts to the United States.

For the first time in history, buglies will be tax free in Nebraska.

In giving off its last the sun loses \$60,000 million tons of matter a day.

PAUK LANE'S OLD ARISTOCRATIC HOUSES A THING OF THE PAST

The lower picture shows Dudley House, as it looked in 1912. This old mansion, along with many others, has disappeared to make way for the new structures of modern design which are shown in the two top photographs. Top left, is the new Alford House, white, right, looking towards the Marble Arch, is the Dorchester House Hotel, with the Grosvenor House Hotel in the distance.

Gardening Notes

Some Thought Should Be Given To Best Methods To Be Followed In Planting

In planning our garden, we find that vegetables divide themselves into certain definite groups. Thus we have corn, cucumbers, parsnips, potatoes, beans, carrots and onions from seed, which occupy the space for the entire season. If our space is limited, we can make the best use of our garden by planting these in rows fairly far apart, and in between grow early crops like onion sets, peas, radish, spinach and lettuce. Or we can put the early group in one part of the garden and follow it by a second crop from short-season stuff such as late cabbage, turnips, Cae lettuce, pickling beets and celery. Generally those vegetables of which the leaves are used, such as the lettuce and spinach, and also the pea crop, go in just as soon as the ground is ready to work. Beets and carrots follow next, with early corn and potatoes. In the third planting we will sow the more tender things which require short seasons, such as beans, melons, squash, and the main planting of corn, potatoes and tomatoes.

To lengthen the season, the sheep should be used early, medium and late maturing sorts, and in the case of the latter we should plant two or three times at ten-day intervals. Before making our flower order, we should check over our list to make sure that we have flowers for cutting, bedding, edging, background and fragrance. There should be early, medium and late bloomers so that there will be flowers all season. We must have a variety of color, but planted so that there will be no clashing of shades. A hastily planned and planted garden where the vegetable crops are crowded, or where pink and yellow flowers come into violent opposition, will certainly not improve the first impression when one is to be most critical. Select your standard varieties, that is, flowers which have given satisfaction in the past, but also add a few new ones for the sake of gaining experience and adding interest.

This is the best time, when the earth is soft and moist, to put the lawn into shape. Dandelions, plantain and other persistent weeds come out easily and in removing them get out as much of the root as possible. Some of the many weeding devices now on the market will save a lot of stooping. At this time, too, a heavy roller is used to good effect, levelling down the lawn and breaking up the roots of the grass. Loosen up bare spots with a rake and re-seed with good mixtures of cheap grasses. These are never permanent and sometimes are dangerous. Protect this new seeding with some poultry netting or burlap, so that sparrows will not get at the seed. Top dressing with well-rotted manure or an application of a good commercial fertilizer, high in nitrogen, is advisable. If manure is used, be careful that it is well-rotted and free from weed seeds. The lawn should be cut every four or five days, after growth gets well started, with a sharp lawn mower. A dull machine will pull out much of the grass. Later on, when the weather turns hot, less frequent cutting is advisable.

Ensures Rapid Growth

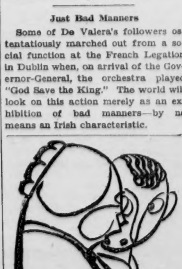

Shades Used By German Gardeners To Protect Saplings

In Germany, arborists are providing specially made shades for the protection of saplings. They are made of closely woven netting on a wooden framework. The shades are placed on the south side of a group of young trees to guard them from the scorching rays of the noonday sun. The trees are said to have shown unusually rapid growth since the new device has been put into use.

Just Bad Manners

Some of De Valera's followers ostentatiously marched out from a social function at the French Legation in Dublin when, on arrival of the Governor-General, the orchestra played "God Save the King."

"The world will look on this action merely as an exhibition of bad manners—by no means an Irish characteristic."

"So you want to be my son-in-law?"
"—I don't—but I want to marry your daughter."—Sondagsne-Sitk, Stockholm.

Anglo-American Good Will O' Firmer Footing Now Than Ever Before, Says U. S. Paper

There is reason for believing that Anglo-American good will has got its roots struck more firmly into the solid ground of mutual respect and dignity than in earlier periods—even those when the plant seemed to be flowering most effluently. Too frequently in the past one has detected a slight waxiness, a touch of artificiality about its most brilliant petals. Before the World War the work of our own horticulturists was often tinged with a sense of inferiority and with the envy and irritation that go with it, while that of the British was not wholly free from a certain condescension. Amid the dazzling prosperity of the post-war world these roles have, perhaps, reversed. British statesmanship continued to find itself up Anglo-American understanding, but the British people could not quite forgive for being such a spectacular success in our own way.

Both moods have collapsed amid the sterner realities of the depression. A common adversity has given each people a better appreciation of the real qualities and greatnesses of the other than either enjoyed five years or twenty-five years ago. The two nations regard each other with less sentimentality than they have sometimes felt, but with much less of ignorant irritation. Publicists who once assuaged themselves by laboring transient fables, who waited their time in warning Americans against entanglement with perfidious Alibion or Britons against engagement in American mere production, are now dropping all that. Each nation now eagerly scans the opposite shore of the ocean, waiting to hear every sign of progress in the other as possibly the first step toward recovery for both. Neither power, in short, is any longer overawed by or afraid of the other, there results an atmosphere in which friendship of the sturdy, unadorned but useful sort can grow and prosper.—New York Herald Tribune.

Shows That Live Stock

Was the Saving Factor

Industry. Weathered this Year Better Than Other Periods of Farm Industry.

The review of the Live Stock Market and Meat Trade for 1931, just issued by the Markets Information Service of the Dominion Department of Agriculture, states: "The commercial meat animals in industry weathered the year much better than any other major branch of farm industry. Indeed, saleable live stock, and with this, of course, we must include poultry, was to its post-war season the saving factor in the year's business on the farm. At the opening of the new year, those producers who had included live stock in their 1931 program, found themselves in a much more advantageous position than those who had not."

New Method Successful

Illustration All Ready To Print Sent By Radio

The North German Lloyd line announces the successful transmission by wireless from Zurich, Switzerland, to the S.S. Bremen, of a picture in the form of an engraving.

The receiving apparatus on the vessel transformed the picture into a cut ready for printing.

The process, known as radio-type, represents several decades of scientific research by Adalbert Guth, director of the Swiss Radio-type Company.

Build. "I hear they are using all sorts of materials in the manufacture of illuminating gas nowadays."

Budd: "True; they may even light I consumed complaints."

More than 1,000 new companies are registered in Sweden last year.

Butler was ready to forgive. "Quite all right, old boy," he said hurriedly: "you said it in the heat of the moment, as it were."

"Yes," returned Tugwood, "I read in the paper today that a rhinoceros is worth £200."

Mistress: "Why don't you light the fire?" Maid: "Because there's no coal."

Mistress: "Why didn't you let me know before?" Maid: "Because we had some before."

Do you believe a man can love two women? "Yes, but only till one of them finds out."—Interessante Blatt, Vienna.

Dominant Optimism

Hon. Frank Carroll Is Struck With the Spirit Of The West

An impression of dominant optimism throughout western Canada has been brought back to the east by Hon. Frank Carroll, Quebec publisher. The west, he said, was looking as "fresh and fragrant" as ever. The people were just as optimistic of the future as they were when I passed over the same ground some eight years ago.

Mr. Carroll spoke of his efforts to save the way for "our intra-empire trade crusade" by increasing trade across Canada. He said he and a group of associates planned to sponsor an "exchange goods" week, in which eastern and western Canada would co-operate during the present year.

"There is little or no Russian Bolshevism among the Canadian-born and a large section of the foreign element of Dakota, which he has visited in the course of his journey."

The Canadian prairies, declared the Quebec publisher, were a "divine industry" in comparison with the western part of Montana and the western section of Dakota, which he has visited in the course of his journey.

Under present plans western Canada in general and Winnipeg in particular will first feel the effect of the new radio broadcasting plan.

When the legislation now before parliament is enacted and the federal radio commission set up, the distinct understanding is that the commission will take steps immediately to improve broadcasting in the three prairie provinces, leaving the situation in the eastern provinces as it is today.

In the east there are a number of good stations, and the commission probably will not do more than lease them for purposes of national broadcast.

In the west, the commission will exercise its authority to take over existing stations or to construct new high powered stations, the objective being to provide good radio coverage in these provinces.

On the tag of the bird, which apparently had perished in a bush fire, was a tag bearing the name of Jack Miner, Ontario naturalist. The bird at one time had sought shelter on the great bird sanctuary at Kingville, and was fed by Miner. The tag and information concerning the incident were sent to Miner by a settler in an isolated district near where the bird was found.

Birds tagged by the naturalist have been found as far east as the Atlantic coast and from the Gulf of Mexico to the Gulf of St. Lawrence. In the last time one ever has been known to cross the Rocky Mountains.

Commenting on the importance of this to western Canada, Mr. Peterson said: "For all points west of Portage la Prairie, there is a very material saving in freight rates from Churchill as compared with those from Montreal, and provided you can start at the seaport on an equal basis."

A French scientist contends that your tongue is long. It denotes frankness; it breeds, expansiveness; if narrow, concentration, and if long and wide, a weakness for gossiping.

Whether English or Italian should be the ruling language is a question which has started a war of tongues in Malta. "Signatures of the English language is a total social drawback," Drax, C.B., D.S.O., etc. He started out with a good name and has been adding to its fame by his deeds; but it is to be feared that for reference purposes the public will have to call him just "the Admiral."

Only One Drawback Sir Alan Cobham's flying circus, visiting the English district of London, England, took aloft a woman aged 90 years, her daughter of 60, her grandson and great-grandson. The old lady's only regret was that her great-grand-grandson, a mere baby, was unable to make the trip, because he lived too far away from the aerodrome.

"It was my ambition that egged me on," said the would-be actor.

"Yes, but I understand it was the audience that egged you off."

432 SHE'S JUST SHOWING HOW ATTRACTIVE AND CHARMING A PRINTED COTTON DRESS CAN BE

And it will cost you next to nothing to make it.

For the original, a China blue and white batiste print was used. The collar was plain white batiste, which also encircles the arms in a narrow cuff effect.

Flats, as is the way with many of the smartest frocks of the season, provide an effective fullness to the skirt of this pretty model.

Listen in Canada-red with white trim and white leather belt, has loads of style and is sturdy too.

Pique, dimity, and dot silks are also suitable.

Style No. 432 is designed for sizes 8, 10, 12 and 14 years. Size 10 requires 2 1/2 yds. of 35-inch material with 1/4 yard of 35-inch contrasting.

Price of pattern 25 cents in stamps or coin. Cash is preferred. Write our agency.

How To Order Patterns Address: Winnipeg Newspaper Union, 173 McDermott Ave., Winnipeg

Pattern No. Size Name Town

Four cables, each containing 26,474 parallel wires compressed into a diameter of 38 inches are required to support the suspension bridge across the Hudson River. The wire in the four cables weighs 28,307 tons.

A French scientist contends that your tongue is long. It denotes frankness; it breeds, expansiveness; if narrow, concentration, and if long and wide, a weakness for gossiping.

Future Development of Western Canada Must Be Planned On a Scientific Basis

Working On Wheat

To Resist Drought

University of Alberta Installing Equipment For This Purpose

Resistance to drought is a new wheat breeding project which has been undertaken by O. S. Arnold, University of Alberta. Over a period of years, losses due to drought are probably as great as all the plant diseases combined. It has been estimated that during each of the last two years, the crop has been reduced by drought by 75 to 100 million bushels. Owing to the failure of crops to become established there is also the enormous loss in fertility due to soil drifting away, the free growth of weeds. The National Research Council has given assistance in carrying out this project which will be under the direction of the associated committee in grain research. Except for some studies made at the University of Alberta on the fundamental nature of drought resistance in plants, little has been accomplished in Canada, but Russia has been intensively studying the problem for some time.

In this work artificial chinchoks are created by a machine. This machine has been described by Dr. T. A. Tolstoy, and similar equipment is being built at the University of Alberta. In this way everything including moisture, is controlled.

Pointing to the seriousness of the water situation in the west, Mr. Main said that a great unity of the southern Saskatchewan and Alberta, and to a lesser degree of Manitoba, would be needed, but by the amount of food that could be produced, but rather by the amount of water that could be conserved.

Consideration of water and timber he considered as the two important factors in solving our drought. Five factors he condemned—close cutting and overcutting of prairie grass; reducing the forest area, chiefly by fire, 90 per cent of which was preventable; draining sloughs and lakes; growing too many cereals in succession; farming land unsuitable for cultivation.

Solutions for drought and soil drifting he gave as follows: planting at least one mile of suitable bridge on each quarter section; strip farming to minimize striking wind ledges are four or five feet high; production of wheat that consumes less water in growing; a great unity of the southern Saskatchewan and Alberta, and to a lesser degree of Manitoba, would be needed, but by the amount of food that could be produced, but rather by the amount of water that could be conserved.

Such an organization is needed to interest shippers to route their business for the Hudson Bay Railway, to be set up by the Federal Government, has been asked by the Saskatchewan Government.

Negotiations, Mr. Buckle revealed, are pending at present for trial shipments of cattle and other farm produce through Churchill this summer.

One firm of ship owners has already said its willingness to charter a ship for the purpose, and cattle owned by the government may in part be used for the test.

Mr. Buckle asked that interested organizations in Saskatchewan join in promotion with the Federal government.

Cheese Is a Body Builder Supplies a Muscle Building Food In Concentrated Form

Here is an interesting item prepared by the Milk Utilization Service of the Dominion Dairy and Cold Storage Branch. "Is cheese eaten for its flavor or for its food value?" The low per capita consumption of cheese in Canada clearly indicates that it is interesting to note that one pound of cheese supplies almost as much protein and fat as one gallon of milk and, in addition, has a high content, phosphorus and vitamins content. The muscle building foods are limited in number, and since it is necessary that the diet contain a percentage of this type of food, cheese should be more extensively used, particularly at a time when health and strength must be maintained on a lowered food budget.

"Admiral" Must Suffer The new commander-in-chief of the West Indies squadron of the Royal Navy is Admiral the Hon. Reginald Aylmer Battenbury-Punkett-Ernie-Rite-Drax, C.B., D.S.O., etc. He started out with a good name and has been adding to its fame by his deeds; but it is to be feared that for reference purposes the public will have to call him just "the Admiral."

Only One Drawback Sir Alan Cobham's flying circus, visiting the English district of London, England, took aloft a woman aged 90 years, her daughter of 60, her grandson and great-grandson. The old lady's only regret was that her great-grand-grandson, a mere baby, was unable to make the trip, because he lived too far away from the aerodrome.

"It was my ambition that egged me on," said the would-be actor.

"Yes, but I understand it was the audience that egged you off."

Radio Announcer: "Good evening, everybody—except my wife. We do not speak at present."—Sodaguisa-Stris, Stockholm.

Spending before a service club at Winnipeg recently, T. C. Main, division engineer of water supply for the Canadian National Railways, and also engineering expert on the Saskatchewan Commission on Conservation and Afforestation, warned that future development of western Canada must be planned on a scientific basis.

"Taslar factors have been made to happen in haphazard manner. Settlers were allowed to homestead and cultivate land that was entirely unfit for cultivation. Sloughs and lakes were drained; timber and bush areas have been burned intentionally and accidentally, and land has been forced to grow cereal crops until practically all the fibres is gone," he stated.

Of the cause of drought were beyond the control of our present state of scientific development, but anyone who has studied the question of drought in southern Saskatchewan, south-easterly Alberta and south-western Manitoba, would agree that human agency was to blame in a measure, he said.

Pointing to the seriousness of the water situation in the west, Mr. Main said that a great unity of the southern Saskatchewan and Alberta, and to a lesser degree of Manitoba, would be needed, but by the amount of food that could be produced, but rather by the amount of water that could be conserved.

Consideration of water and timber he considered as the two important factors in solving our drought. Five factors he condemned—close cutting and overcutting of prairie grass; reducing the forest area, chiefly by fire, 90 per cent of which was preventable; draining sloughs and lakes; growing too many cereals in succession; farming land unsuitable for cultivation.

Solutions for drought and soil drifting he gave as follows: planting at least one mile of suitable bridge on each quarter section; strip farming to minimize striking wind ledges are four or five feet high; production of wheat that consumes less water in growing; a great unity of the southern Saskatchewan and Alberta, and to a lesser degree of Manitoba, would be needed, but by the amount of food that could be produced, but rather by the amount of water that could be conserved.

Such an organization is needed to interest shippers to route their business for the Hudson Bay Railway, to be set up by the Federal Government, has been asked by the Saskatchewan Government.

Negotiations, Mr. Buckle revealed, are pending at present for trial shipments of cattle and other farm produce through Churchill this summer.

One firm of ship owners has already said its willingness to charter a ship for the purpose, and cattle owned by the government may in part be used for the test.

Mr. Buckle asked that interested organizations in Saskatchewan join in promotion with the Federal government.

Here and There

Anticipations are that there will be an attendance of 500 Rotarians at the district convention to be held at the Cornwall Inn, Kentville, N.S., June 1 and 2. It is expected that Mr. John Bennett, of St. John's, Newfoundland, will address the convention.

Hon. Gordon S. Harrington, premier of Nova Scotia, accompanied by Mrs. Harrington, left Halifax recently for Montreal where they boarded S.S. Duchess of Bedford for a short holiday in the Old Country. During his absence, Hon. Percy C. Black will be acting premier of the province.

"It is not too much to say that any improvement in the revenues of the railroads will immediately make itself felt in all channels of trade and that the maintenance of railroad solvency will do more than any other domestic factor to restore strength to the nation's institutions," says an editorial in the *Charleston, S. C., Post*.

The "career open to merit" in railway affairs is well illustrated in the case of Charles H. Deving, a railroader for 48 consecutive years, recently promoted to assistant general manager of the Reading Company, in 1931, at the age of 37. Deving began his railroad career as a trainman in the employ of the Philadelphia & Reading Railway, now the Reading Company.

There were 417 moose and 3594 deer shot in New Brunswick last year, according to figures contained in the annual report of Chief Game Warden H. H. Ritchie to the provincial Minister of Lands and Forests. There was also a very successful partridge season with a bag of 4449 birds.

Warmer weather and generally favorable conditions point to normal development of the western wheat crop, according to the report of the agricultural department of the Canadian Pacific Railway. Virtually all of Manitoba's seed is in and Saskatchewan and Alberta seedling will be completed by the end of the third week of May.

Are Delicious - Try Them

Two famous photo-artists, Mr. Roy Chapman Andrews, noted author, and his wife, Mrs. Andrews, recently on Canadian Pacific liner Empress of Canada, the former on his way to Peking and the latter travelling with Mrs. Davis to Honolulu.

Success attending the inaugural cruise of S.S. Princess Alice last year to northern British Columbia and Alaska has led the British Columbia Coast Steamship Service to provide another special Alaska cruise with the S.S. Princess Charlotte, leaving August 9 from Vancouver. It is announced by E. P. L. Sturges, general passenger agent, Canadian Pacific Railway.

Capital, labor, the learned professions, diplomacy and business were all represented in the passenger list of the Canadian Pacific liner Empress of Australia on arrival at Quebec recently. The list included Sir Charles Gordon, president of the Bank of Montreal; Tom Moore, president of the Trades and Labor Congress of Canada; P. B. Meredith, K.C., Dr. Moser, consul-general for Czechoslovakia, and Colonel Hercules Barre, Canadian Government Trade Commissioner in Paris.

Residents of Maritime Province will have a fine opportunity of visiting Montreal's great Naval and Military Tournament, May 27-29, through a special low rate Canadian Pacific coach excursion leaving Saint John, Fredericton, Woodstock, St. Stephen and St. Andrews's May 27. Similar excursions over the same week-end are being operated by the railway from Vermont, and the Suburby, Ontario, areas. (245)

About Town and Country

Early closing on Wednesday, will be commenced June 1, and continued through the months of June and July.

BORN—To Mr. and Mrs. H. Dell of Lundine, on Monday May 23, 1932, a daughter.

Service at Oyen United Church next Sunday, will be conducted by the C.G.T. groups. A cordial invitation to attend is extended to all.

Mr. and Mrs. J. J. Purcell who were Calgary visitors last week, returned to Oyen Friday night.

Father Lynett, who motored to Calgary last week with Mr. and Mrs. J. J. Purcell, returned to Oyen last Saturday with his own car, which he had previously left in the city.

Rev. and Mrs. E. F. Kemp and family left last Monday en route to Edmonton, where Rev. Kemp will attend the annual conference of the United Church of Canada. They were accompanied by Mr. Otto Rolles of Andia Valley.

Mrs. G. Allen of Calgary, is visiting at the home of her daughter Mrs. R. J. Scott.

Dr. J. P. Korr motored to Calgary yesterday.

Victoria Day was cold and cloudy and did not prove an ideal day for holiday makers. Rain commenced to fall in the evening, and this morning at 7 a.m. the rain gauge showed .25 inch precipitation. At noon another .15 inch was registered.

CARD OF THANKS

For the kindness and sympathy shown in our recent bereavement and for the many beautiful floral offerings, we extend our heartfelt thanks. A. C. Hoenig and family.

The C.W.I. will hold a sale of home cooking and afternoon tea, in the Case show rooms, on Saturday, June 4.

Mr. Thos. Lees and Andrew, Mr. J. C. Desso and Miss J. Morrell, left this morning en route to Calgary, but after getting west of Exel returned to town on account of the condition of the roads.

Mr. James Lees, Mr. Arthur Gibson and son George who motored to Calgary last week, returned to Oyen this morning by train. Mr. Lees left his car in Calgary.

Mr. and Mrs. J. R. Acheson and daughter Shirley, Mrs. F. C. McLean, Miss Royce Scott and Mr. R. E. Gillespie, left last Sunday for Calgary. Mrs. F. C. McLean remained in Calgary but the rest of the party returned to Oyen last night.

Mr. and Mrs. C. P. Snyder returned to Oyen last Saturday, after spending a few days in Calgary.

Mrs. Howarth of Delia is visiting her sister Mrs. C. P. Snyder.

Mr. W. F. Pratt, who has been working at Youngstown for several months, returned to Oyen today and is again on the staff at the local depot.

Mr. Arthur Johnson and Mr. C. V. Johnson left this morning for Calgary.

Wonderful growth has been made by trees in the village during the present month. After looking over photographs of the town taken ten or twelve years ago their beauty may be more fully appreciated.

EXCEL NEWS

Excel U.F.W.A. met May 19 at the home of Mrs. F. E. Thayer with a large attendance. Roll call was answered by "A Tribute to Mothers". Arrangements were made for the "Dry Cleaning Demonstration" which will be held in Excel School 2 p.m. Saturday June 18. Everybody is cordially invited to attend. The program on "Good-will Day" was in charge of Mrs. E. Church and Miss McDonald and was much enjoyed by all. The flower contest was won by Mrs. Banks and Mrs. H. L. Bishop got the consolation prize. There will be no meeting in June owing to the demonstration.

Lunddale and Farming Valley Schools visited North Excel School and played two games of soft ball. The first game played by Lunddale and North Excel, umpired by F. E. Thayer was won by North Excel Farming Valley defeated the winners. This game game was umpired by Andrew Lees of Oyen.

Mrs. F. E. Thayer has returned home from an extended visit to Seattle and other points in Washington.

Mrs. S. J. Cushey and Mrs. E. E. Vanstone left for Frankfort Ontario on May 16 to attend the funeral of their father, Mr. W. Wiley who died on Sunday following an operation.

Mr. E. E. Vanstone, and Mr. and Mrs. J. O. Vanstone drove to Kerrville, Sask., on May 19, to attend the funeral of the former's father, Mr. John Vanstone, who died at the home of his daughter on May 18.

Impressive Funeral Service at Sibbald for Mrs. A. C. Hoenig

(Continued from page 1.)

was resting easily when her husband left the house at 6 a.m. Tuesday morning. On returning to the house at 8 a.m., her husband found her unconscious. Dr. Harvey of Alaskan was called and on his recommendation she was taken in to Alaskan hospital, where she died shortly after 6 o'clock in the evening, never having regained consciousness. A post mortem revealed the cause of death to be a burst pancreas.

Besides her husband and two children, Vernon, 8, and Helen, 7, she is survived by two sisters and two brothers, Mrs. Becky Johnston, Glasgow, Scotland; Mrs. Harriet Wilson, Hamilton, B. C.; Mr. Jack Bryan, Roseland, B. C.; and Mr. Alex. Bryan, Trail, B. C.; the last named three being present at the funeral, motoring to Sibbald from their homes in British Columbia.

Mr. and Mrs. Noble Martin, brother-in-law and sister of Mr. Hoenig, who motored to Sibbald from Waterloo, Iowa, are visiting at Mr. Hoenig's home.
